

You will not have to concern yourself with wood rotting problems when you build one of these Robertson Metal Depots metal building kits. These kits are available in a wide assortment of sizes, designed to meet your local building codes and the bolt-together design simplifies installation. By using a slope of greater than 2:12, you can take advantage of one of our many cool roof colors which can help reduce air pollutants and possibly help lower your utility costs. As with most metal buildings, you will enjoy the long life and low maintenance features. There will be three sets of erection drawings with each package and permit sealed drawings are available upon request.

Robertson Metal Depots offers Classic Steel Buildings in three sizes/loads, as well as the option to add additional length, gutters and downspouts.

## Two-Door Classic Steel Building - Available in two widths 25' W or 20' W x 25' L x 12' H

- 26-gauge color PBR roof & wall panel
- Engineered seal drawings
- 4:12 roof pitch
- Two 8' x 8' framed openings
- Two DBCI 2500 Series roll-up doors
- 3' x 7' man door (hardware included)

## One-Door Classic Steel Building - 15' W x 25' L x 12' H

- 26-gauge color PBR roof & wall panel
- Engineered seal drawings
- One 8' x 8' framed opening
- One DBCI 2500 Series roll-up door
- 3' x 7' man door (hardware included)

## Storage and Handling of Bundles

**NOTICE:** The bundle must be inspected and carrier advised immediately if damage is noted. If water is permitted to enter the bundle, it is necessary to open bundle, separate material and dry all surfaces.

Protect sheets while nestled in bundles:

1. Store bundled sheets off the ground sufficiently high to allow air circulation beneath bundle and to prevent rising water from entering the bundle. Slightly elevate one end of the bundle.
2. Prevent rain from entering bundle by covering with a tarpaulin, making provision for air circulation between draped edges of tarpaulin and the ground.
3. Prolonged storage of sheets in a bundle is not recommended. If conditions do not permit immediate erection, extra care should be taken to protect sheets from white rust or water marks.
